Linear measurements: 2/6 (33.3%). Including area/perimeter: 4/10 (40%). Target: 70%.

Horizontal extents are proxies, not matched walls. Area/perimeter references assume rectangular rooms.
App display rounding limits interpretation of small error differences. Opening correspondence remains incomplete.
Hall room area is 13.99 m²; the property summary says 13.98 m². Per-room value used; outcome unchanged.
